

Email Assistance

Why do I need an email address to register for a Chahta Achvffa account?

The Chahta Achvffa online portal requires an email address to confirm account registration. Your email address will be our primary way to contact you when there is important information that we need to communicate related to your online portal account.

Where can I create an email account?

It is easy to create a free email account. There are many different secure sites that offer this service for free, such as the ones listed below:

Microsoft: <https://outlook.live.com>

Yahoo: <https://login.yahoo.com>

Google: <https://www.google.com/gmail>

An account will need to be created on one of the email sites with your personal information before you can register for a Chahta Achvffa account. But in both cases, it only takes a few minutes if you have your personal identification information handy!
